

CONSTRUCTION INDUSTRY COVID-19 CALL TO ACTION

Emergency Supplies Needed for Medical Personnel

As you know, our nation is now united in a common fight to arrest the spread of COVID-19. Such a time requires us to work together toward the common good. With that in mind, the organizations listed below have joined forces to provide immediate and dire assistance to those on the front lines of this pandemic.

Our local medical care providers are in urgent need of protective equipment to preserve their own health as they work to test and treat those who may be infected. Many of these items are commonly used by our industry and we need your help to secure donations of any materials you can spare.

“The emergency medicine doctors who hold the front line of our healthcare system are desperate for the personal protective gear that will keep patients and themselves safe. Please share what you can.”

Hemant Vankawala MD FACEP, President, Texas College of Emergency Physicians

What we need:

**Unopened N-95 Face Masks
Paper Masks & Face Shields
Disposable Gloves**

Please collect and box your donation. Mark the box as “Construction Industry Donation” and DACA will pick them up to deliver all at once to Baylor, HCA, and local Fire Stations

The health of the construction industry and our own families depends on the swift and complete defeat of this unprecedented threat.

Thank you in advance for your help.
